iCloud Backup & Restore Steps

iCloud Backup:

Step 1. Launch the Settings app.

Step 2. Tap on your Apple ID name above the Airplane Mode toggle switch.

Step 3. Tap on iCloud.
Step 4. Scroll down and tap on **iCloud Backup**.

Step 5. Turn on the **iCloud Backup** switch.

Step 6. If you want to backup iPhone or iPad immediately then tap on **Back Up Now**.

![iPhone and iPad screens showing iCloud Backup settings]

iCloud will backup your iPhone or iPad whenever you are connected to a charger and a Wi-Fi network. But you can always take a backup of your device immediately using the **Back Up Now** option.
iCloud Restore:

Step 1 of 8

1. Find "Restore from iCloud Backup"
You can restore content from an iCloud backup when your phone is activated for the first time and after a factory reset. When this screen is displayed, your phone is ready to restore content from an iCloud backup.

Step 2 of 8

1. Find "Restore from iCloud Backup"
Press Restore from iCloud Backup
Step 3 of 8
2. Restore content from iCloud backup
Press the field next to "Apple ID" and key in the username for your Apple ID.

Step 4 of 8
2. Restore content from iCloud backup
Press Next.
2. **Restore content from iCloud backup**

Press the field next to "Password" and key in the password for your Apple ID.
Step 7 of 8

2. Restore content from iCloud backup

Press **Agree.**
