

Eisner Health ADRD Workflow

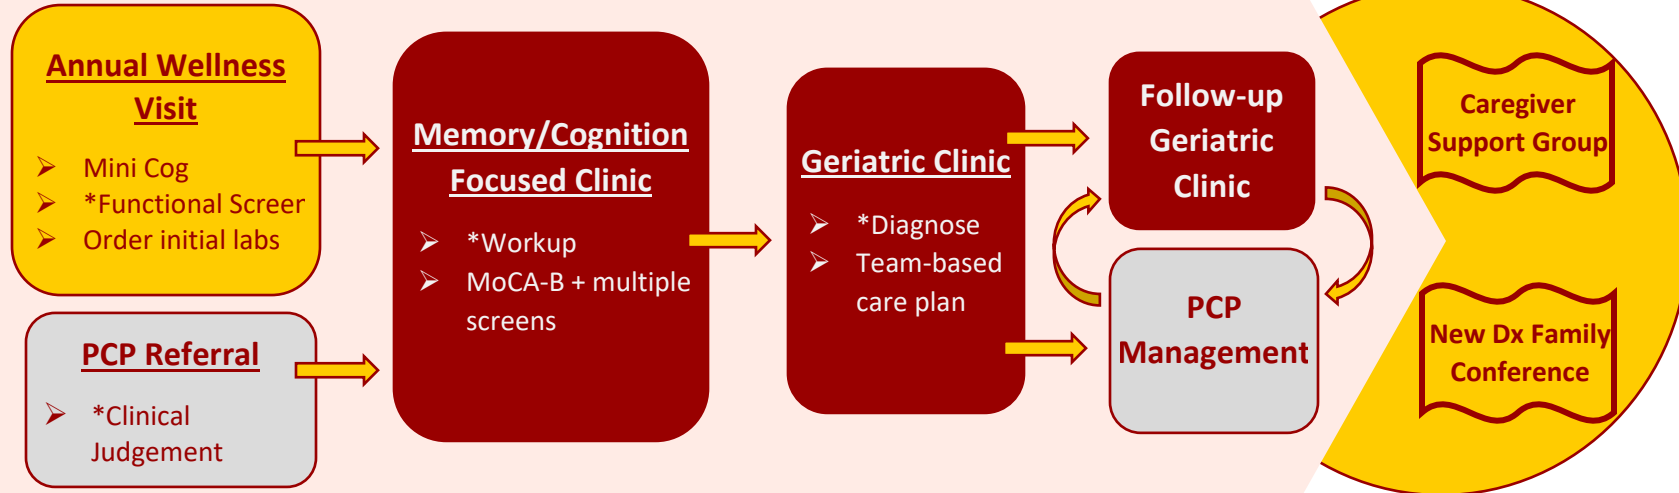

Project Summary: The USC GWEP partnered with Eisner Health, a Federally Qualified Health Center, serving primarily immigrant, Spanish-speaking, urban older adults, to build sustainable workflows to identify older adults with cognitive impairment and provide case management with ongoing program evaluation.

Ongoing Training

- **Didactic:** lectures prior to implementation
- **Workshops:** interactive skills practicum
- **At elbow:** in clinic with older adult patients

(GWEP Interprofessional team + Eisner Geriatric Champions)

IMPACT

Patient Level

Consistent cognitive impairment screening/follow up in AWW & increasingly at primary care visits
Increased diagnosis of cognitive impairment & ADRD (from 2.82% in 2019 to 8.47% in 2022)
 Older adults with cognitive impairment and care partners have **access to interdisciplinary, geriatric-trained, team-based care plan & follow up**

Health System Level

Creation of **diverse primary care workforce** with skills **servicing Latinx older adults** in low-resourced setting
Increased clinical confidence in managing cases of persons with cognitive impairment & dementia
 Moving toward **age-friendly dementia** care with culturally appropriate workflows for older adults with little formal education

For resources, please see the USC GWEP Website
